DETAILED ACTION

1. Claims 1-47 are pending.

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species:

- evaporation (claim 20), heating between 30°C and 55°C (claim 21), extraction (claim 22), diluting (claim 23) or vacuum (claim 24);

The species are independent or distinct because they are drawn to methods that require distinct steps and equipment for practice. A search for one method would not render results relevant to the others, and therefore a search and examination of anything more than one of the above species would be a burden for the Examiner.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-19 and 25-47 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1633

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. Because these species are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
